Test Results and Evaluations

Grube KG Forstgerätestelle, Hützeler Damm 38, 29646 Bispingen

Application field

Lifting and piling logs for fuel wood processing, manual wood processing and as a manual aid when working with log splitters.

Test item	Test result
Handling	<p>Good force transmission of the tip with ergonomically favourable hand position with good weight distribution</p> <p>Safe penetration of softwood, hardwood and frozen wood due to the low weight and shape of the hook requires higher impact energy</p> <p>Very good grip due to anti-slip surface</p> <p>Stem exchangeable</p>
Durability	<p>Good quality and workmanship of the materials used.</p> <p>Maintenance-free handle, Stable design</p>

Description

Hooks of tempered steel; Stem made of high quality aluminium; Handle in grip area with non-slip surface and anti-slip protection.
